

/ Role: DevOps Lead

About LexSnap

LexSnap is an innovative new company that brings together modern technology and legal expertise to offer a fresh approach to legal content.

To our clients, LexSnap offers fast, practical advice on a range of issues. To lawyers, we offer an innovative, networked approach to meeting clients.

We have an opportunity for an experienced DevOps Lead with development experience to join LexSnap's small and dynamic team.

About Web Application Development at LexSnap

The Development team is responsible for coding and implementing new features for the newly launched LexSnap site. We work in cross-functional teams and believe in delivering features quickly with a keen eye for where improvements can be made. This is a fantastic opportunity to join a company early in its life and benefit from a culture that values innovation. As we grow we're looking to build a team of bright, inventive people who can help bring AI and machine learning to the legal world. The field of Legal-tech is about to open up and we are building an innovative product that will put us at the forefront.

As a young company with a modern outlook, we believe work should be flexible, and do our best to meet our employee's needs. At LexSnap you will work with a diverse group of people with an interesting range of backgrounds

Job purpose:

We are looking for DevOps Lead with software development experience. Software engineers with relevant experience are also welcome.

Responsibilities:

- Focus on the integration of a natural language search engine like Elastic Search into our platform
- Work with developers and 3rd parties to deploy and optimise natural language interfaces
- Evaluate APIs and third-party services for use with LexSnap
- Take part in delivery of infrastructure for production and testing environments, including but not limited to the following
- Design infrastructure according to the business requirements
- Prepare application configuration to deployment into infrastructure environments
- Participate in the Production issues investigations

Requirements:

- Experience in software development and/or system administration
- Strong proficiency with Linux OS & ability to setup Java and PHP with MySQL environment from scratch for production purposes.
- Knowledge of PHP or Java
- Excellent knowledge of MySQL
- Experience in deploying and optimising Apache SOLR or Elastic Search
- Excellent knowledge of Apache/Nginx & HTTP/s requests routing through web-servers.
- AWS hands-on experience
- Google Cloud experience would be a plus
- Experience with AI interfaces like DialogFlow, IBM Watson or equivalent would be a plus
- Basic Networking knowledges: addressing, routing and switching
- Understanding of software development lifecycle
- Proficient understanding of Git.
- Intermediate English.
- Great communication skills

Available to start immediately.

Location:

Based in London, willing to travel

If you're interested in joining the team at LexSnap, please send a CV and cover letter describing why you think you are a good fit for the team.

We are proud to foster a workplace free from discrimination. We strongly believe that diversity of experience, perspectives, and background will lead to a better environment for our employees and a better product for our users.

How to apply:

Please email your CV and attach a 1-page cover letter to careers@lexsnap.com. Please include any links to blogs or content you have created in your application.
